# AUTOMOTIVE SAFEAI DAY

## CHAIRPERSON'S OPENING REMARKS

6<sup>TH</sup> MARCH 2025  
RICCARDO VINCELLI  
DIRECTOR, FUNCTIONAL SAFETY COMPETENCE  
CENTER,  
AUTOMOTIVE CORE DEVELOPMENT TECHNOLOGY  
RENESAS ELECTRONICS CORPORATION

# RICCARDO VINCELLI: WHO AM I?

Working as Director of the Functional Safety Competence Center

- 25 years at Renesas Electronics Europe
- Background in HW design
- Responsible for independent technical assessment of Renesas products (MCU, SoC, ASICs, SW) targeting worldwide market

Involved in

- Safety activities since 2005 for the development of Renesas solutions based on IEC60730, IEC61508 and ISO26262
- Standards as ISO26262, UL4600, IEC61508
- Standardization bodies as ISO, IET, SAE (Functional Safety Committee, ORAD, AI), UL, IEC

Part of the organizing committee of

Member of the Industry Advisory Board of

**ORAD:** On-Road Automated Driving

---

# About the club

- Set up during covid lockdown when missing actual physical meetings
- Volunteer based, no formal set up (**yet**), no profit-making machine, no actual membership to a club!!
- Initial Objecting: Support the functional safety community during time of transition
- Achieved: digital and in person conferences, collaborations, academic scholarships, mentorship program
- Next: ???

# For today

- 60% friends and old colleagues of the committee + 40% (hopefully) new friends of the club
  - During the day, think and help us form the club's activities: **What do *you* want to achieve through this community? *Is it Your personal and professional development or Organisational growth?***
  - End of day roundtable and gather feedback
-

---

# Agenda of the day

Moderator: Riccardo Vincelli, Renesas Electronics

## Part 1: Safety of AI Systems

**13:40** How do you show you have met the EU requirement for freedom from unreasonable risk when the design relies on AI? - **Roger Rivett**

**14:10** E2E AI - **Gareth Price**, wayve

**14:40** Discussion: Considerations about safety assurance for AI - **David Ward**, Horiba MIRA

**15:20** Break

## Part 2: The use of AI and development and lifecycle processes

**15:50** Balancing Safety and Innovation: DevOps for ADAS/AD in Delivering Continuous, Safe, and Evolving Products - **Fredrik Sandblom**, Zenseact

**16:20** Challenges for Compiler for AI Models - **Stefan-Alexander Schneider**, Kempten University of Applied Sciences

**16:50** Safety of Software-Defined AI-Driven Vehicles, **Jonas Nilsson**, NVIDIA

**17:20** Discussion on future club activities + General Q&A
